DETAILED ACTION

This Office Action is responsive to the applicants' election filed on Oct. 19, 2007.

Information Disclosure Statement

1. The listing of references in the specification is not a proper information disclosure statement. 37 CFR 1.98(b) requires a list of all patents, publications, or other information submitted for consideration by the Office, and MPEP § 609.04(a) states, "the list may not be incorporated into the specification but must be submitted in a separate paper." Therefore, unless the references have been cited by the examiner on form PTO-892, they have not been considered.

Drawings

2. Figures 10-12 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

3. The abstract is objected to because they include reference characters which are not enclosed within parentheses so as to avoid confusion with other numbers or characters.

4. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

Election/Restrictions

5. Applicants' election of the species of Figs. 1-3, in the reply filed on Oct. 19, 2007 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

- In view of the allowance of the generic claim 1, non-elected claims 5-10 have been rejoined with their base claim.

- This application is in condition for allowance except for the presence of claims 11-13 directed to species non-elected without traverse. Accordingly, claims 11-13 should be cancelled.

Claim Objections

6. Claims 1-10 are objected to because of the following informalities: claim 1: page 2, line 11, "the rotor side" should be changed to --a rotor side --; page 2, line 11, "the rotor rotating shaft" should be changed to -- a rotor rotating shaft --; claim 10, page 4, line 2, "an engagement portion" should be changed to --the engagement portion --. Appropriate correction is required.

- The claims not specifically mentioned are objected to since they depended from the above claim 1.

Conclusion

7. This application is in condition for allowance except for the following formal matters: as set forth above.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 25 USPQ 74, 453 O.G. 213, (Comm'r Pat. 1935).

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

Prior Art

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure and consists of ten patents: Nitsche et al. (U.S. Patent Number 4,836,755), Kietzman et al. (U.S. Patent Number 5,417,554), Schaffer et al. (U.S. Patent Number 5,466,134), Tani et al. (U.S. Patent Number 6,746,215), Takimoto et al. (Publication Number JP 03-067092), Miyai (Publication Number JP 07-305688), Hayashi et al. (Publication Number JP 2002-308007), Morozumi et al. (Publication Number JP 2003-106272), Nakamori et al. (Publication Number JP 2003-214372), and Tanaka (Publication Number JP 2004-143978), each further discloses a state of the art.
